MODEL PORTFOLIOS ASSET CLASSES

We have outlined Cash, Debt, Property, Infrastructure, and Equity as the five main asset classes, and brief descriptions of each can be found below:

Asset Classes	Description
Cash	This will be either cash on the portfolio or on some occasions a cash fund if the ethical criteria are met.
Debt	This will include funds holding fixed income, index linked, floating rate notes and short-term bills.
Property	We favour listed REITs and funds holding listed REITs, but may include traditional open ended property funds.
Infrastructure	This largely includes investment trusts and funds where the underlying companies own and operate infrastructure, including renewable assets such as wind farms and solar parks.
Equity	This is traditional equity exposure. Funds are diverse in their geographical exposure and active managers are mainly selected, with screening exposure ranging from avoidance to impact.

RISK AND PERFORMANCE DATA

All of the model portfolios are risk rated by Defaqto, EV and Dynamic Planner, whilst performance and risk data is available from Financial Express (FE).

Risk ratings alongside financial information can be found within the product brochures as well as on the monthly factsheets.

FUND ONLY MPS

The risk parameters below apply to King & Shaxson's Fund Only Model Portfolios, which combine traditional open ended funds only.

We invest in well-established fund houses and due diligence of fund investment teams and underlying holdings is ongoing. We invest in funds with genuine ESG and Impact credentials across the asset classes highlighted.

DEFENSIVE

A "Defensive" risk portfolio seeks to provide an enhanced level of capital protection whilst still allowing investors the ability to achieve modest long-term growth (10 years). The portfolio is suitable for risk-averse investors whose financial temperament cannot tolerate variation in performance. Whilst the emphasis is on lower volatility and capital preservation, a small amount of risk will be taken to seek a higher return.

Property	10%	0%-30%
Infrastructure/Yield Cos	7.5%	0%-30%
Equity	20%	10%-40%

CAUTIOUS

A “Cautious” risk portfolio seeks to provide a level of capital protection whilst still allowing investors the ability to achieve long-term growth (10 years). The portfolio is suitable for risk-averse investors whose financial temperament cannot tolerate much variation in performance. Whilst the emphasis is on lower volatility and capital preservation, a modest amount of risk will be taken to seek a higher return.

Property	10%	0%-30%
Infrastructure/Yield Cos	7.50%	0%-20%
Equity	37.5%	25%-50%

BALANCED

A “Balanced” risk portfolio seeks to provide a balance between capital protection and appreciation by investing in a diversified portfolio of asset classes over the long-term (10 years). The portfolio is suitable for those whose financial situation can tolerate a moderate level of volatility in performance.

A “Balanced Growth” risk portfolio seeks to provide a riskier alternative to our balanced portfolio, with an increased bias to capital appreciation by investing in a diversified portfolio of asset classes over the long-term (10 years). The portfolio is suitable for those whose financial situation can tolerate an above moderate level of volatility in performance.

ADVENTUROUS

An "Adventurous" risk portfolio seeks to achieve high returns.
